CALACATA CARRARA

Category: marbles

Colour: White

Petrographic name
(according EN
12407): Marble

Macroscopic
description: Calacata
Carrara marble is a
splendid Italian marble
extracted from Carrara
quarries in the Apuan Alps.
The main characteristics of
this beautiful natural stone
are its warm white
background crossed by
light brown and grey
veining, a material very
sought after in the last few
years due not only to its
beauty and elegance but
also its technical qualities,
durability and resistance,
that make it perfect for
many types of applications
and design projects.
Calacata Carrara marble is
suitable for interior and for
exterior projects.

Calacata Carrara is also
characterized by a rather
fine and compact grain, a
lithotype that resembles
very much a breccia. Rare
surface porosity is
apparent, Calacata Carrara
becomes very shiny if
polished so it's perfect for
elegant and refined
floorings, staircases,
decorative objects,
bathroom and kitchen
countertops and facings of
many kinds. Calacata
Carrara is available in big
block and it is an excellent
